NAV-750BR and NAV-750B FAQ

Q. What are major differences of NAV-750B & NAV-750BR?

A. NAV-750BR comes with Step attenuator 0 dBm to -127 dBm
NAV-750BR is Automatic version of NAV-750B. Includes 100 Hz frequency resolution.

NAV-750BR is operated by GPIB link to a computer. Control commands are sent by the computer to operate the unit. Frequency, modulation, and other functions are set via this computer link (almost none of the front panel controls are used on this model). This model requires a computer with GPIB connection and suitable software to control the unit.
