

PS-525 Portable Digital Pitot-Static Tester with Encoder Reader

• Most Affordable Digital Tester • More Convenience • More Functions • Less Maintenance

The PS-525 Pitot-Static tester is designed specifically for the needs of general aviation. It is a low-maintenance, digital tester that is truly portable. The two internal re-chargeable batteries enable the test set to be used completely independent of any external power source. (A non-battery option is also available.)

Unlike any other pitot-static test box, the PS-525 also includes an encoder reader. This decoder will display gray code and RS232 at speeds of 1200, 2400, and 9600 baud.

Check out these features!

- Altitude goes up to 35,000+ feet/10,700 meters
- Built-in Encoder reader for displaying Gray Code, and RS232: 1200, 2400, 9600 baud
- Selectable timing for Leak Check feature in Altimeter and Airspeed modes
- Altitude is displayed in 1, 2, and 5-feet/1meter increments
- Altimeter section includes VSI - Vertical Speed Indicator
- Displays airspeed in Knots, KPH and MPH to 650 Knots
- Read pressure in inHg, mbar, mmHg, PSIA, and E.P.R.
- Independent Vacuum and Pressure pumps and systems
- Specifically designed and priced for non-RVSM use
- Lightweight - about 20 lbs
- Removable lid
- Dimensions: 12"D x 15"W x 9.5"H
- Powers 12 and 24 Volt encoders
- Limited 2-year warranty
