#### **Differences between 429EX, 429EBP, 429EN**

429EX provides 429 processing along with trapping capability for up to 255 labels.

429EBP same as 429EX with addition of printer port and unique label definitions for Boeing aircraft.

429EN packaged in a Military type travel box. 429 label capability is the same as the 429E (a predecessor to the 429EX – so even less capability than the 429EX as far as label definitions). But this is unique to the military with unique cables for direct connect testing as called out per very specific requirements.
