Subject: Form, Fit, and Function Relationship Between HHMPI (FDS40-0301), PI/2 (17TES0065), and Portable Interface 1 (17TES0043)

To whom it may concern,

This letter is to provide clarification regarding the relationship between the Hand Held Multi-Purpose Interface (HHMPI), part number FDS40-0301, the Portable Interface/2 (PI/2), part number 17TES0065, and the earlier ACRON (formerly L-3Harris) Portable Interface 1 (PI/1), part number 17TES0043.

The HHMPI (FDS40-0301) is the same form, fit, and function as the PI/2 (17TES0065). The HHMPI performs all functions previously carried out by the PI/2, including download capability for the following L3 recorders:

- F1000 FDR
S800-XXXX-XX; S903-XXXX-XX; S703-XXXX-XX; S603-XXXX-XX
- FA500X FDR/CVR/CVDR
- FA2100 FDR
50XX-XXXX-XX; 2100-2XXX-XX; 2100-4XXX-XX
- FA2100 CVR
- FA2100 CVDR
2100-1XXX-XX; 2100-3XXX-XX
- FA2200 CVDR
2200-XXXX-XX
- FA2300 CVDR
2300-XXXX-XX
- UQAR QAR200
QAR200-XX-XX

In addition to these, the HHMPI PN FDS40-0301 supports download capability for various other manufacturers' recorders, expanding beyond the PI/2's original scope.

For historical context, the PI/2 (17TES0065) was the replacement for the Portable Interface 1 (17TES0043). The PI/1 was developed specifically for the FA2200 MADRAS FDR, FA2300 MADRAS CVFDR, and FA2100 FDR/CVR. It did not interface with any other recorder types.

Best Regards,
Gerald L. Godbee,
