

# ADTS-3350 Air Data Test Sets

High Precision  
**RVSM Compliant**

Rugged, compact durable design for  
**Flightline Applications**

Calibrate, test and troubleshoot  
**Aircraft & Instruments**

ADTS-3350 is common equipment  
that can be used for a variety of  
**Commercial Aircraft**

**NSN: 4920-01-662-3920**

**P/N: ADTS-3350ER** (Ext. Range)  
**ADTS-3350MR** (Mid Range)  
**ADTS-3350LR** (Low Range)

## ADTS-3350 Series Flight Line Air Data Test Set

TestVonics ADTS-3350 Series Test Set is a portable, high precision, dual channel air data pressure management system. This tester is designed to calibrate, test and troubleshoot air data instrumentation and aircraft pitot-static systems. The test set has been designed with functional and reliability features highly suited to withstand the harsh environmental and demanding conditions of the flight line environment. The test set is designed for testing a wide range of commercial and military aircraft, both rotary and fixed wing. The ADTS-3350 accuracy complies with standards for RVSM.

### Features

The ADTS-3350 features a brilliant 8.4-inch transfective, high-bright ruggedized LCD display. The display features an optically bonded resistive touchscreen and adjustable LED backlighting, which provide optimal visualization and viewing angle in direct sunlight. The backlit keypad is used to control the test set and can be easily operated using gloves or mittens. The ruggedized case features recessed hardware, a replaceable retractable handle and durable wheels for excellent maneuverability and single operator transport. The ADTS operates from 90-260 VAC, 45-440 Hz power, making it ideally suited for the varying hangar, ramp and flight line power sources.

### Simple and Intuitive Interface

The ADTS-3350 software features an intuitive graphical interface which has been designed to virtually eliminate the operator learning curve. Mode of operation can be cycled while testing and the display is uncluttered and easy to read.

## Protection and Safety Features

The ADTS-3350 Series is designed with both hardware and software safety features designed for maximum protection when testing. The test set features input pressure regulation, over-range, over-limit and over-pressurization protection. Micro-porous filters and screening prevent debris from entering the system. The test set is equipped with pressure relief valves to protect the pneumatic system components and the Unit Under Test (UUT) from damage. In the unlikely event that the test set loses power, the UUT is isolated. The manual vent switch on the front panel can then be used to safely vent both the test set and the UUT to ambient.

The ADTS features an Aircraft Select Mode, which allows the operator to select pre-installed or customized Aircraft or UUT. Once set, the software automatically limits the ranges and rates for the specific aircraft under test. Test profiles can be created for routine testing, providing improved test consistency.

### Remote Operation

The ADTS-3350 Series has two (2) Remote Control Units available. Both units feature color touchscreens, one is a tablet style and the other features a color coded keypad. Both remotes feature a similar display format as the main unit. A 25ft remote cable is included.

### Automated Calibration

The ADTS-3350 can be calibrated automatically through software. Corrections are done through software requires no mechanical adjustments. The transducers are able to hold their accuracy for a period of one year.

# TestVronics™ ADTS-3350 Series Air Data Test Set

	Specifications
<b>Altitude (Ps) Range<sup>1†</sup></b>	-2,000 to 35,000 ft (LR - Low Range) -2,000 to 65,000 ft (MR - Mid Range) -3,000 to 80,000 ft (ER - Extended Range) <sup>4</sup>
<b>Static (Ps) Sensor</b>	0.350 to 38.000 inHg
<b>Altitude Accuracy</b>	±3 ft @ 0 ft ±7 ft @ 30,000 ft ±36 ft @ 65,000 ft ±75 ft @ 80,000 ft <b>RVSVM → COMPLIANT</b>
<b>Altitude Rate<sup>2</sup></b>	0 to 50,000 ft/min
<b>Altitude Rate Accuracy</b>	±10 ft/min or ±1% of setting
<b>Altitude Resolution</b>	1 ft, 0.01 mbar, 0.0001 inHg (Ps), 0.01 mmHg
<b>Altitude Units<sup>3</sup></b>	feet, meters, inHg, mmHg, mbar, hPa, PSIA
<b>Airspeed (Pt) Range<sup>1</sup></b>	0 to 650 knots (LR / MR) 0 to 1,000 knots (ER)
<b>Pitot (Pt) Sensor</b>	0.350 to 110.000 inHg
<b>Airspeed Accuracy</b>	±0.5 kts @ 50 knots ±0.1 kts @ 550 knots ±0.05 kts @ 1,000 knots
<b>Airspeed Rate<sup>2</sup></b>	0 to 800 kts/min
<b>Airspeed Rate Accuracy</b>	±1% of setting or ±10 kts/min
<b>Airspeed Resolution</b>	0.1 kt, 0.01 mbar, 0.0001 inHg (Pt), 0.01 mmHg
<b>Airspeed Units<sup>3</sup></b>	IAS/CAS, kts, Mach, inHg, mmHg, mbar, hPa, PSIA, kph
<b>Display</b>	8.4-inch LED backlit Touchscreen LCD
<b>Interfaces</b>	External: Remote, Service / Internal: RS-232, USB (optional)
<b>Altitude (Static) Port</b>	Standard: Male JIC 37° -6 AN Stainless Steel bulkhead Optional: Self-sealing Quick-disconnect, Red
<b>Airspeed (Pitot) Port</b>	Standard: Male JIC 37° -4 AN Stainless Steel bulkhead Optional: Self-sealing Quick-disconnect, Blue
<b>Calibration Cycle</b>	One (1) year
<b>Power Requirements</b>	90-265 VAC, 45 - 440 Hz, 1 Phase
<b>Dimension / Weight</b>	19.5 x 21.5 x 18.2 in (LxWxH) / 84 lbs (standard case) 25.4 x 20.0 x 14.5 in (LxWxH) / 82 lbs (new case)

### ADTS-3350ER Front Panel Features

- Airspeed Pitot (Pt) input
- Altitude Static (Ps) input
- 8.4" LED Touch Display
- Backlit Color Keypad
- External Ground
- Power Switch
- Power/Line Indicator
- AC Power Input
- Remote Control port
- Service port
- Manual Vent
- Moisture Vent

### Handheld Remote Control Unit (RCU) Options

3.5" color, sunlight readable touchscreen display

Backlit Keypad  
30-key keypad

**Remote Control Unit**  
NSN: 7035-01-662-3604

7.0" color sunlight readable projected capacitive (PCAP) touchscreen

**New! Tablet style Remote Control Unit** (available 2019)

### New! Composite ADTS Case with Air Data Manifold

**Colors**

- all Stainless Steel/Hardware
- Ruggedized IP67-rated impact resistant case. Certified to ATA 300, ASTM D4169 and MIL-STD-810F specification
- Integrated 5 port Pitot / 5 port Static Air Data Manifold (optional)
- Spring loaded soft grip side handles
- Field replaceable 2-stage retractable handle with polyurethane wheels
- Automatic Pressure Relief Valve
- Large soft grip handles

### Colors

- Rubber Bumpers
- Ruggedized wheels
- Recessed grasp handles
- Telescoping 3-stage retractable handle
- Lowered Air Intakes

<sup>1</sup>) Standard ranges listed. Ranges may be configured to comply with customer specific requirements - contact TestVronics for more information † -10,000 to 99,000 ft Altitude Range is also available per customer requirement. <sup>2</sup>) The Altitude and Airspeed Slew Rates are load dependent. Slew rates and load test requirements may vary based on volume of the DUT. <sup>3</sup>) Standard units of measurement listed (at time of print). Additional units may be available upon user request.
